

Curriculum Vitae

Name: Daniele

Surname: Ceppi

Born on 02/03/1995 in Trieste, IT

✉ dceppi@uni-bonn.de

☎ +39 328 388 9099

Current position

From February 2024

PhD

Institution: BCTP - University of Bonn

Supervisor: Guglielmo Lockhart

Relevant publications: “*M5 branes on ADE singularities: BPS spectrum and partition functions*”, with Guglielmo Lockhart - [arXiv:2510.19682](https://arxiv.org/abs/2510.19682)

Education

From October 2019
to March 2023

Master's degree in theoretical physics

Institution: University of Trieste

Grade Point Average: 29.5 / 30.00

Final vote: 110 / 110 cum Laude

Thesis: “*Moduli spaces of three dimensional supersymmetric gauge theories: Hilbert series and dualities*”

Supervisor: Roberto Valandro

From October 2015
to March 2019

Bachelor's degree in physics

Institution: University of Trieste

Grade Point Average: 27.76 / 30.00

Final vote: 105 / 110

Thesis: “*Black Holes and Uniqueness Theorems*”

Supervisor: Stefano Ansoldi

Research topic and motivation

My current research concerns 6d SCFTs on ALE spaces and their partition functions, computed via instanton counting methods. A key part of my work focuses on the sigma model of BPS strings in these theories, whose target space is the instanton moduli space described by Kronheimer-Nakajima quivers. My motivation to attend this school is to deepen my understanding of instantons, their moduli spaces, and quiver varieties, and to apply this to extend my research, e.g. to toric singularities for which the moduli space is still a quiver variety.
